DESCRIPTION OF ACTIVITIES: Throughout the year, as Past President I participated in all conference calls organized by President Rikli for the Executive Board. I invited an interdisciplinary team of Fellows to work with me toward framing the way we might approach our theme for the 2010 meeting, Bridging Kinesiology and Society. This group worked with me on multiple occasions via conference calls and numerous email discussions to identify two subthemes. Based on these decisions I organized subcommittees to identify the format and speakers who might be well-suited to address the issues we wanted to cover. I worked with the subcommittee chairs and our HK liaisons, Amy Rose and Kim Scott to work out details of travel arrangements and support for external speakers and the Vendien International Lecturer. As well, I identified the Rainer and Julie Martens' Keynote Address speaker, and invited two guest speakers for our luncheon on Friday. Last, I organized a task force to meet on Friday afternoon and work toward identifying guidelines for AAKPE position papers. The outcome of this session will be shared with members during our annual Business Meeting.
